Restriction/Election

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-6 and 11-15, drawn to the eyeglasses having an opaque layer of film on the lens covering the lower region, classified in Class 351, subclass 45.

II Claims 7-10, drawn to a sheet having a back layer and plurality of pairs of opaque layers of film supported thereon, classified in Class 156, subclass 39+.

III. Claims 16-21, drawn to the method of training an individual in fielding baseball using glove, classified in Class 351, subclass 53.

The inventions are distinct, each from the other because of the following reasons:

Each of the invention, I, II and III, recites limitations not recited in any of the other invention. The differing limitations make the inventions I, II and III patentably distinct from one another, i.e. a reference that anticipates or makes obvious one of the inventions I, II and III would not, by itself, anticipate or make obvious any of the remaining invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
